

# The GO Run For Fun School Twinning Programme

**GO Run For Fun** is an international programme working with schools across the **UK, USA, Germany, Switzerland, Belgium, Italy, France, Norway and Mexico.**

We are keen for schools to benefit from this international network by creating partnerships between schools in different parts of the world.

Participating schools then share their **GO Run For Fun** journey with their twinning school.

## What is the aim of the GO Run For Fun School Twinning Programme?

The simple aim is to connect schools from different countries and enable them to share and celebrate their involvement in the **GO Run For Fun** health & wellbeing programme and the fun running event, encouraging each other along the way.

## Why connect with another GO Run For Fun school from a different country?

Twinning with another **GO Run For Fun** school will provide pupils with a window to different cultures, different environments and different school routines. It will provide an opportunity for schools to work collaboratively with a school from another part of the world.

This will help pupils to broaden their knowledge and understanding of the world they live in, whilst sharing and celebrating their **GO Run For Fun** health and wellbeing programme experiences. Schools can use this to support their curriculum too, with opportunities to develop geographical, environmental, English, health and language knowledge.
